

# *PSTN Point to Point Telemetry*

- Poor radio path,
- To far for low power radio
- Need to replace discontinued SS300 Equipment

## Distance is no object

Churchill Controls PSTN Point to Point telemetry  
Uses standard subscriber telephone line to pole outstation  
at suitable intervals and can be configured to provide  
exception reporting for critical alarms. 8 Digital and 2  
analogue signals in each direction

*Micro\_Link PSTN System*
